Pricing Recommendation

General Facts About Pricing...

There are certain factors that are within our control and some factors beyond our control when it comes to setting the price. Those factors within our control are: the appearance of the property, how aggressively we market the property and the price. Factors outside our control are: location of property, size and local amenities. It's important to accept those factors that are beyond our control and focus on the pricing and preparation.

A property priced at market value will attract more buyers than a home priced above market value. Consider that a competitively priced property will also attract a greater number of potential buyers and increase your opportunity for a quick sale.

Market Statistics...

<u>Sell Price Statistics</u>		<u>Sell Price Per Sq. Ft. Statistics</u>	
Average Price:	\$346,600	Average Price/Sq Ft:	\$302
High Price:	\$398,500	High Price/Sq Ft:	\$375
Median Price:	\$380,000	Median Price/Sq Ft:	\$299
Low Price:	\$275,000	Low Price/Sq Ft:	\$243

Figures are based on selling price after adjustments, and rounded to the nearest \$100

Comparing the Area (SqFt) Total of the subject property with those of the comparables suggests a price of 349,900.
